Objective

Detail-oriented MERN stack developer passionate about learning, problem-solving, and building user-focused applications. Eager to grow skills, contribute to impactful projects, and collaborate in innovative environments

Skills

- **Languages & Frontend:** JavaScript, TypeScript, Python, HTML5, CSS3, Tailwind CSS, Styled Components, React, React Native, Next.js
- **Backend:** Node.js, Express.js, FastAPI, MongoDB, Firebase
- **Tools & Platforms:** Git, VS Code, Nginx, Docker
- **Technologies:** MERN Stack, LangChain.js, DataStax Astra DB, Cloud Deployments

Work Experience

Mobile App Developer(iOS/Android) | Sphinx Solutions, Pune, MH *Jul 2023 – Mar 2024*

- Built **Archive Intel**, secure compliance chat app with real-time messaging and notifications using Firebase
- Engineered **Java–React Native bridge** for seamless cross-platform functionality and performance
- Developed key modules for **Loan Management** and **Matrimonial Apps**, including auth and dashboards
- Collaborated with designers, engineers, and QA to deliver scalable, client-aligned projects within deadlines
- Enhanced UX through best practices in **state management, APIs, debugging, and optimization**

Education

St. Vincent Pallotti College of Engg. and Tech *Aug 2016 – May 2020*
B.E. in Electronics and Telecommunications

Projects

RAG Chatbot with LangChain.js *RAG-Chatbot* ☒

- Built Retrieval-Augmented Generation chatbot using LangChain.js, OpenAI APIs, and Next.js frontend
- Integrated DataStax Astra DB for efficient vector search and seamless large-scale data handling
- Deployed on Digital Ocean cloud platform ensuring high availability, reliability, and optimal scalability

Session Notes *Session Notes* ☒

- Built a secure Notes SaaS backend using Node.js, Express, and MongoDB with RESTful APIs
- Implemented session-based authentication with hashed passwords, access control, and route protection
- Developed complete CRUD operations for personal notes, ensuring data validation and user-based access

Clinic Front-Desk System *Front-Desk System* ☒

- Built secure full-stack app with Next.js, React, NestJS, TypeORM, and MySQL using JWT authentication
- Developed real-time dashboard for queue and appointment management with dynamic doctor profiles
- Added interactive scheduling modals for CRUD operations, streamlining workflow and improving UX

Food Delivery Application *FoodDeliveryApp* ☒

- Developed a scalable food delivery application with product menus and seamless order management
- Designed responsive UI using React and Tailwind CSS; backend powered by Node.js, Express, and MongoDB
- Added dynamic restaurant and food listings, enabling instant menu changes and improved user engagement

Certifications

Full Stack Development Bootcamp *Mar 2025 – Aug 2025*

- The Hacking School, Hyderabad, Telangana

Post Graduate Diploma in Mobile Computing *Sept 2022 – Mar 2023*

- CDAC (Center for Development of Advanced Computing), Pune, Maharashtra
